

BAROMETER INSTRUCTIONS

HOW TO SET THE BAROMETER:

- *For the atmospheric pressure reading in (mbar) refer to the radio, television, newspaper and or weather bureau for you local reading.*
- *At the back of the barometer turn the top screw clockwise and or anti-clockwise with a small screwdriver until the black needle is in line with the appropriate (mbar) reading, this will now calibrate your barometer .*
- *Line up the gold adjustable needle with the black barometer needle daily. If the black barometer needle has moved during the day and or night, it would be indicating changing weather conditions.*
- *Before reading the barometer tap on the glass to make sure the needles are not jammed.*
- *For best results, place barometer near a doorway.*
- *Hygrometer and thermometer require no maintenance as it is calibrated at the factory.*

The wooden frame is made in Australia using Australian plantation wood , and is assembled and packed by "Cobb & Co. Clocks Australia Pty. Ltd."
